CATALYST
Technology Solutions Inc.

Supplier capability statement

Catalyst is a growing team of 10 based in Milton, Ontario, delivering scoped network and on-site infrastructure projects for organizations, IT teams and delivery partners.

MILTON, ONTARIO
Halton and the Greater Toronto Area; travel and availability agreed by project.

PROJECT & SUBCONTRACT DELIVERY
Defined work packages, planned changes, site assignments and coordinated rollouts.

Core capabilities

Network engineering

Switching, wireless, firewall changes, troubleshooting and equipment refreshes.

Cabling & data centres

Copper and fibre work, patch panels, IDF/MDF spaces, labelling, testing and rack installations.

On-site IT support

Site visits, hardware changes and delivery coordinated with internal or remote teams.

Systems & relocation

Server hardware support, office IT moves, equipment inventory and reinstallation.

Technical expertise

A CCIE-certified specialist across network, security, data centre and service provider environments.

Completed project experience

Workplace network refresh

Replaced access points, switches and UPS batteries; cable checks, service validation, UAT and asset handover.

300 Cat 6 connections

Data, voice and security connections with patch panels, termination, labels and cable management.

Cisco Catalyst 3850 upgrade

After-hours stack software upgrade following the client's ITSM process, with verification records.

Office IT migration

Moved computers and a network rack, with inventory, before-and-after records and service restoration.

ITAD & data destruction

Coordinated IT asset disposition with a third-party provider responsible for data destruction.

A clear plan. A documented handover.

Scope, resource assignments, change windows, test records and acceptance are agreed for each engagement. Mandatory supplier conditions, insurance, security screening and site access are reviewed for the specific opportunity.
